

Wickens Vacuum Blasting

SAVE TIME AND MONEY BY CLEANING IN PLACE

The **Wickens Vacuum Blasting System** is a dust-free process which has built-in controls to protect both the technician and the surrounding environment during the entire cleaning process.

It offers a **safe and eco-friendly** procedure removing, collecting and packaging the waste for easy disposal. Vacuum Blasting can be performed on lead and asbestos based paint, as well as mould removal.

AN IDEAL SOLUTION FOR
Inside industrial facilities
and/or confined spaces

ADVANTAGES OF VACUUM BLASTING

- ✓ Blasting Produces No Dust
- ✓ Performed in Place
- ✓ Minimal Interruptions
- ✓ No Clean Up
- ✓ Safe Removal of Lead or Asbestos Based Paint
- ✓ Maintains a Dust Free and Safe Environment

EFFECTIVE CLEANING ON LARGE & SMALL AREAS

This system has a three- stage separator including High-Efficiency Particulate Air (HEPA) filters to capture small, unwanted particles and contaminants from the blast stream.

NO DOWNTIME OR CLEAN UP REQUIRED

Work can be carried out more effectively with fewer interruptions by containing blast media eliminating the need for clean up after the work is performed.
